Office Action Summary

In a response of 11/4/02 to a restriction requirement of 8/26/02, applicants elected Group II claims 15-31 without traverse.

5 Claims 1-14 and 32-45 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 11 (filed 11/4/02).

Claims examined on the merits are 15-31.

Claim Rejections - 35 USC § 112

10 The following is a quotation of the first paragraph of 35 U.S.C. 112:

15 The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 15 and 17-31 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a surface treatment as required by claim 16, does not reasonably provide enablement
20 for other surface treatments. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

The specification fails to disclose other surface treatments that
25 will provide a substrate as required containing a membrane that is non-reflective and provides little fluorescence from about 300 to 700 nm.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C.

112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 15-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are confusing and unclear by "phase-inversion support" in claim 15 (line 7) being uncertain as to meaning and scope. It is uncertain how "phase-inversion" defines the support. Claim 15 is further confusing how the membrane can contain a support, opaque solids and a substrate. Is the support, solids and substrate attached to the membrane or are they within the membrane. Requiring the opaque solids to bound to or within the phase-inversion in claim 15 (lines 10-11) is confusing since a separate phase-inversion has not been previously required. Claim 15 is unclear as to the position of the support when a surface treatment bonds the membrane and substrate together.

The claims are free of the prior art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David M. Naff whose telephone number is (703) 308-0520. The examiner can normally be reached on Monday-Thursday and every other Friday from about 8:30 AM to about 6:00 PM.
